ACADEMIC APPOINTMENTS Postdoctoral Research Associate, Georgia Policy Labs, July 2019 –
Andrew Young School of Policy Studies, Georgia State University

EDUCATION **Tulane University**, New Orleans, LA

Ph.D., Economics, 2019

Advisors: Alan Barreca, Ph.D, Michael Darden, Ph.D, and Diego Rose, Ph.D

M.S., Economics, 2015

Universidad Iberoamericana, Mexico City, Mexico

B.S., Economics, 2008

RESEARCH INTERESTS Health Economics, Environmental Economics, Development Economics, Public Economics.

- WORKING PAPERS
1. **“Behavioral Responses to Mass Shootings: Physical Activity, Mental Health and Labor Outcomes”**. *Job Market Paper*
Abstract: *The odds of experiencing a mass shooting in first person are low, approximately 411 people have died in such tragic events during the past decade in the United States. However, the high saliency of mass shooting events might induce changes in behavior that may pose an external cost on society. In this paper, I estimate the impact of indirect exposure to mass shootings on behavior using information on 45 mass shootings from 2003 to 2016. Using individual-level data, I find that being within 500 miles shortly after a mass shooting, individuals overall activity levels decrease by 1.3 percent. This decline is equivalent to a 10 or 3.7 minute decrease in walking or running, respectively. For an average weight person, this decline would mean 34.5 less calories burned per day. The decreases in activity are highest among women and younger individuals. In addition to activity levels, I find an increase in the probability of having 14 or more days where perceived mental health is not good. Finally, I find a statistically significant decrease in hours worked of 0.5 percent or 10.7 minutes a week. This decrease is highest for women. These results show that aside from direct victims, mass shootings also impact the short-term behavior of a broader portion of the population.*
 2. **“What to Expect When You’re Labeling? Calorie Labeling’s Impact on Weight Gain During Pregnancy and Birth Outcomes”** (Main Author) with Koray Caglayan
 3. **“Measuring the Impact of Calorie Labeling Laws: The Mechanisms Behind Changes in Obesity”** (Main Author) with Michael Darden and Diego Rose. *Submitted*
 4. **“Measuring Directional Mobility: The Bartholomew and Prais-Bibby Indices Reconsidered”** Satya R. Chakravarty, Nachiketa Chattopadhyay, Nora Lustig and Rodrigo Aranda. Tulane University Working Paper No. 1720. *Submitted*

5. “Can We Reduce Greenhouse Gas Emissions by Choosing Different Foods? Simulating Carbon Footprint and Nutritional Impacts of Dietary Change in the United States” with Amelia Willits-Smith, Martin Heller, Paul Hutchinson and Diego Rose. *Revise and Resubmit*

WORKS IN
PROGRESS

1. “Climate Change, Time Use and Obesity-Related Behaviors” with Alan Barreca
